Skills

Nuxt JS . React JS . Node JS . Flutter . AWS . Docker . Git . GitHub Actions . Neo4j . MySQL . MongoDB .DSA .C++ . HTML .CSS . Java . Python . AI/ML

Experience

Cybercom Creation

Ahmedabad

Software Engineer

07/2024 - Present

- Contributed significantly to the **1StopBedrooms** project, enhancing its development, performance, and success, while driving innovation.
- Utilized **GraphQL** for efficient data querying and backend communication, optimizing data retrieval and performance load times.
- Developed robust front-end applications with Vue.js and **Nuxt.js**, ensuring smooth, intuitive user-friendly functionality.
- Focused on creating scalable, high-performance web components and ensuring seamless integration between front-end and backend services.

Cybercom Creation

Ahmedabad

Full Stack Intern

01/2024 - 06/2024

- Developed a strong foundation in HTML, CSS, JavaScript, and **MySQL**, building dynamic, responsive web applications with backend integration.
- Worked with **Angular**, **TypeScript**, Vue.js, and Nuxt.js to create **scalable**, high-performance web solutions for various applications.
- Focused on developing **reusable components** for improved code maintainability, efficiency, and streamlined database management.

Projects

E-commerce website for algriculture product

- Developed a platform with user registration, **OTP** authentication, and **JWT token-based login** for secure access and enhanced security.
- Implemented features for product browsing, purchasing, and payments using **Razorpay**, ensuring a smooth experience.
- Utilized React JS for the frontend and **Express JS** for backend APIs, while managing data with MySQL to ensure reliable database management.

Social Media API

- Created a **RESTful API** using Node.js and **Neo4j** to manage users, posts, comments, and friendships, leveraging the graph database.
- Implemented REST endpoints for profile management, post creation, commenting, and **social interactions**, ensuring scalability and functionality.
- Included **Swagger** for comprehensive API documentation and testing, improving usability, reliability, and ease of integration.

AWS Nuke Desktop Tool

- Created a desktop application using **Electron JS** for managing AWS resources and automating cleanup for better cloud management.
- Integrated the **aws-nuke** CLI to efficiently remove specific AWS resources, enhancing **resource control** and management.
- Implemented a user-friendly interface for seamless AWS resource management, ensuring smooth interactions and reliable performance.

Education

Marwadi University

Rajkot

Bachelor of Technology (Information and Communication Technology) | CGPA: 8.40 / 10

2020 - 2024

BAPS Vidyamandir

Gondal

12th | 55.9

2019 - 2020

BAPS Vidyamandir

Gondal

10th | 61.28

2017 - 2018

Courses & Certificates

AWS Academy Cloud Foundations

Mastering SQL Joins - Coursera

Interests & Hobbies

Badminton

Movies & TV Series
